

## Oracle Cloud Jumpstart Services for the Public Sector

### Set Yourself up for Success

Moving your on-premise Oracle Enterprise environments to the cloud can provide many benefits. However, to do so effectively, you need the right guidance and expertise. Together, Affigent and Courage IT can help you quickly and efficiently generate a maximum return on investment by providing a comprehensive set of services and hands-on training. Our team of Oracle Cloud experts will help you:

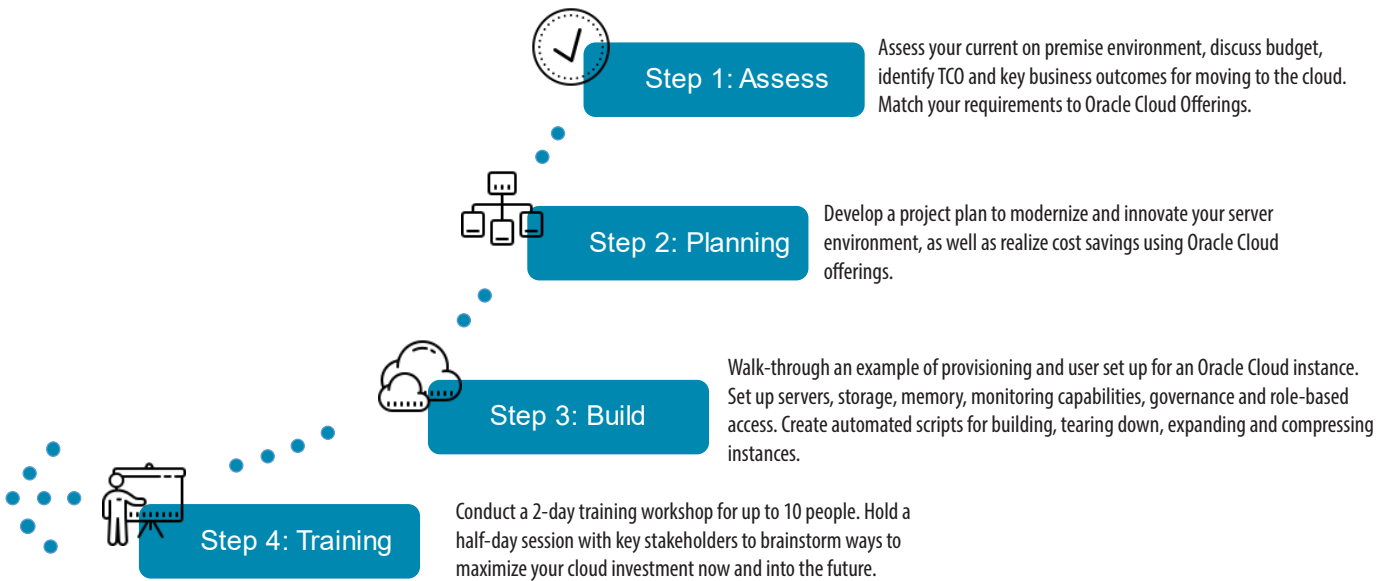

- Develop a Total Cost of Ownership (TCO) that includes a high level analysis of your current architecture versus future cloud architecture, and savings that can be realized from server, storage, network, labor, and software license costs.
- Develop a phased migration plan that includes determining when to move workloads to the cloud.
- Maximize your overall Oracle investment by understanding and utilizing key Oracle Cloud offerings.
- Set up, manage, and automate your cloud instances.
- Administer and maintain your environments.

### The Jumpstart Process

Once our cloud team assesses your current on-premises environment, we establish your budget requirements and provide a total cost of ownership (TCO) analysis for your move to the Oracle Cloud. Next, we guide you through the entire process from provisioning and user set up, to administration and maintenance. After setting up your environment, our cloud experts will host a training workshop to help your team navigate the new environments and discuss how to realize the full potential of your Oracle Cloud investment with key stakeholders.

## Jumpstart Process Overview

Our Jumpstart service offering has clearly defined levels of service designed for Oracle Cloud configurations and is specifically tailored for public sector organizations. This program can be customized to fit your specific requirements. In general, the Jumpstart program is conducted in four phases:

## The Affigent & Courage Difference

When it comes to executing cloud migrations, we understand that time, integrity, accuracy and security of your data is critical. The faster your agency can adapt to and stand up its cloud solutions, the more time it can spend on improving and innovating its systems. Together, Affigent and Courage IT offer a proven, systematic methodology and streamlined process of migration that produces results quickly with minimal disruption to your agency and stakeholders.

As strategic Oracle partners, together Affigent and Courage stand ready to fulfill all of your Oracle Cloud needs – from pre-sales consultation, architecture, design, proto-typing and testing, to security, migration support and sustainment, and even staffing.

Affigent is an Alaska Native Corporation (ANC) and Small Disadvantaged Business (SDB) offering several unique contracting advantages and incentives. When your organization needs to meet its federal cloud requirements, together Affigent and Courage are your best starting point for a productive, cost-effective transition to the cloud.
