

Akima IT Solutions: Cloud Computing

Affigent

A successful cloud migration involves two key elements: planning and prioritizing. However, the strategies you take to get to the cloud depend on the portfolio you are trying to migrate. There is no “out-of-the-box” or “one-size-fits-all-agencies” approach.

Affigent, as part of Akima's family of companies, is uniquely positioned to help agencies in their journey to the cloud. Our services span the full implementation lifecycle, from pre-sales engagements such as Cloud Readiness Assessments and Proofs of Concepts all the way through to post-implementation and support for driving end user adoption and future expansion. We can help you evaluate your current environment, plan and prepare applications for migration, implement robust cloud security policies following NIST and FedRAMP, and perform testing and Disaster Recovery validation in your new cloud environment. Whether you are looking for end-to-end services, or support for only a piece of the transition, our cloud experts stand ready to support your efforts.

Akima Cloud Transformation Approach

Akima offers a clearly defined approach to cloud transformation no matter where you are in your cloud journey:

Partnered to Meet Your Unique Needs

Having a partner who not only understands cloud migration and implementation but also licensing, such as Akima and its family of companies, is also a key risk mitigator. Akima holds partnerships with leading Cloud Service Providers such as Oracle and Microsoft, and can offer the full range of cloud services to drive efficiency and reduce risk.

Past Performance

From pre-sales to post-implementation, our cloud experts are helping agencies transform the way they operate.

U.S. Air Force

- ✓ Cloud Proof of Concepts
- ✓ Services to prepare for cloud migration (i.e. collapsing domains)
- ✓ Requirements analysis and development of cloud infrastructure requirements
- ✓ Preparation for and migration to a public or private cloud (network analysis, clean-up/prep of current environment, troubleshooting, migrating and/or staging functional systems/applications in the cloud)
- ✓ Expertise with MS Azure and Office 365 (public and private)
- ✓ VMware virtualization within the cloud
- ✓ User/Help Desk support within a private or public cloud environment
- ✓ Ancillary services related to cloud service engagements: project management, configuration/change management, security scanning, etc.

Drug Enforcement Agency

- ✓ End-to-end hybrid cloud architecture, design and implementation services

United States Patent and Trademark Office

- ✓ Cloud Proof of Concepts
- ✓ Private/custom cloud architecture and design services
- ✓ Migration into the cloud (public and private)
- ✓ Expertise in Database as a Service (DBaaS) cloud environments with Oracle enterprise manager cloud control 12x
- ✓ Setup and configuration of Platform as a Service (PaaS) infrastructure zones
- ✓ Configuration of cloud self-service portals
- ✓ Creation of self-service portal users
